AALIYA MANYAR

Java Full-Stack Developer

SUMMARY

Enthusiastic Java Full Stack Developer with a passion for crafting efficient and scalable web applications. Skilled in both frontend and backend technologies, including Java, Spring Boot, React.js, and MySQL, I enjoy turning complex problems into smooth, user-friendly solutions. Always eager to learn, innovate, and contribute to meaningful projects, I aim to grow technically while adding value to a collaborative and dynamic development team.

SKILLS

- **Programming Languages:** Java, JavaScript, Core Python.
- **Backend:** Spring Boot, Spring MVC, Spring Data JPA(Hibernate) REST APIs, Spring Security, Node.js.
- **Frontend:** React.js, HTML, CSS, Bootstrap, Angular.
- **Databases:** MySQL, MongoDB, PostgreSQL, RDBMS.
- **Build & Tools:** Git, GitHub, Maven, VS Code.

SOFT SKILLS

- Organized & Motivated
- Conflict Resolver
- Critical Thinker
- Good Communication
- Time Management
- Continous Learning

EDUCATION

JSPM University

Bachelor's Degree in Computer Science
2023 – 2026 CGPA - 8.43

Ashok Vidyalaya And Jr .College

HSC
2021 – 2023 Percentage - 61.67%

Shri Shivaji Vidyalaya

SSC
2020 – 2021 Percentage - 89.40%

EMPLOYEMENT HISTORY

Cybersecurity Intern

Palo Alto Networks | May 2024 – Jun 2024

- Conducted vulnerability assessments and threat analysis to identify system security risks.
- Used cybersecurity tools such as Nessus, OpenVAS, and SIEM platforms for monitoring and detection.
- Analyzed attack vectors and implemented security practices aligned with NIST and ISO 27001 frameworks.
- Participated in penetration testing, threat hunting, and incident response simulations.

Data Engineering Intern

EduSkills Foundation | May 2025 – Jun 2025

- Built AWS-based data pipelines and ETL workflows using Amazon S3, Glue, and Redshift.
- Processed large datasets and performed data analysis using SQL and cloud data tools.
- Automated data processing using AWS Lambda and cloud-native services.
- Implemented secure and scalable cloud data architectures using AWS best practices.

CERTIFICATION

- **Data Engineering Virtual Internship -** AWS Academy (2025)
- **Cyber Security Virtual Internship -** paloalto Networks (2024)

PROJECTS

ChatWave – Cross-Platform Real-Time Messaging App

Personal Development Project | 2026 — Ongoing

Tech Stack: React.js, JavaScript, Vite, Tailwind CSS v4, WebSocket Gateway, Redis, Node.js

- Engineering a cross-platform messaging app with real-time 1:1, group, and topic-based chat, using a responsive layout that adapts between desktop and mobile from one codebase.
- Designing Wave Rooms, group chats that auto-archive after inactivity via a scalable delayed-job architecture, with manual revive and live status updates.
- Building Voice Waves, a scrubbable waveform voice-messaging system with drag-to-seek playback and timestamped inline replies.
- Developing live group Voice Rooms with real-time speaking indicators, host controls, screen sharing, and reactions.
- Architecting the core data model and REST/WebSocket API layer with end-to-end encryption, plus cross-device sync for drafts and active chats.

SAWARI – Women Safety Focused Ride Sharing Platform

Personal Development Project | 2026

Tech Stack: React.js, JavaScript, HTML, CSS, Spring Boot, REST API

- Engineered a role-based ride-sharing platform focused on enhancing safety and reliability for women commuters through secure user, driver, and admin workflows.
- Developed interactive dashboard interfaces for users, drivers, and administrators using React.js with modular components and responsive layouts.
- Implemented role-based authentication and protected routing to control access to different features across the application.
- Designed a driver and user verification system with document submission and admin approval workflow to improve platform trust and security.
- Integrated an SOS emergency alert system with instant trigger and monitoring capability to enhance user safety during rides.
- Built scalable frontend architecture and connected application modules with REST-based APIs for future backend integration.
